

CAREER OPPORTUNITY

JOB TITLE	Tissue Machine Operator		
COMPANY	Universal Paper Manufacturers		
DEPARTMENT	Paper Factory		
PURPOSE OF THIS POSITION			
<p>To ensure the efficient, safe, and high-quality operation of the tissue machine and associated processes. This includes executing the production plan, maintaining product standards, completing accurate shift documentation, and conducting routine maintenance. The role requires close collaboration with the shift team, adherence to health and safety standards, and the flexibility to step into key roles as needed. With a strong focus on continuous improvement, the operator plays a vital part in achieving production targets while upholding the company's operational and quality objectives.</p>			
JOB TASKS & RESPONSIBILITIES			
<table style="width: 100%; border: none;"> <tr> <td style="width: 50%; vertical-align: top;"> <ul style="list-style-type: none"> - Accomplishes manufacturing results by ensuring that all machine operating standards are adhered to at all times. - Maintains outputs and quality by monitoring steps of the process, setting processing variables, observing control points and monitoring personnel and resources as well as facilitating corrections to deviations from standards. - Executes the production plan as instructed by the Shift Supervisor and record all manufacturing outputs in the relevant shift production sheets both accurately and in detail. - Maintains product quality by enforcing standards as per specification and ensuring correct operation of the tissue machine and associated equipment. - Provides manufacturing information by completing shift production sheets. - Maintains a safe and clean working environment while ensuring compliance with established policies and procedures. - Responsible for ensuring that the Machine man is effective at his particular tasks. </td> <td style="width: 50%; vertical-align: top;"> <ul style="list-style-type: none"> - Capable of standing in for the Shift Supervisor, Stock Prep operator as well as the Machine man when required. - Responsible for testing of the finished product, including but not limited to MD and CD tensile, grammage, stretch and moisture. - Perform routine preventative maintenance inspections and checks on equipment as required. - To work closely with your shift Supervisor and pulp line operator to ensure smooth and efficient operation of the shift. - Be capable of machine start-up and shut downs as well as product change overs. - Be capable of fulfilling production shut tasks such as felt and wire changes, clothing washes, blade changes and any other task deemed reasonable. </td> </tr> </table>		<ul style="list-style-type: none"> - Accomplishes manufacturing results by ensuring that all machine operating standards are adhered to at all times. - Maintains outputs and quality by monitoring steps of the process, setting processing variables, observing control points and monitoring personnel and resources as well as facilitating corrections to deviations from standards. - Executes the production plan as instructed by the Shift Supervisor and record all manufacturing outputs in the relevant shift production sheets both accurately and in detail. - Maintains product quality by enforcing standards as per specification and ensuring correct operation of the tissue machine and associated equipment. - Provides manufacturing information by completing shift production sheets. - Maintains a safe and clean working environment while ensuring compliance with established policies and procedures. - Responsible for ensuring that the Machine man is effective at his particular tasks. 	<ul style="list-style-type: none"> - Capable of standing in for the Shift Supervisor, Stock Prep operator as well as the Machine man when required. - Responsible for testing of the finished product, including but not limited to MD and CD tensile, grammage, stretch and moisture. - Perform routine preventative maintenance inspections and checks on equipment as required. - To work closely with your shift Supervisor and pulp line operator to ensure smooth and efficient operation of the shift. - Be capable of machine start-up and shut downs as well as product change overs. - Be capable of fulfilling production shut tasks such as felt and wire changes, clothing washes, blade changes and any other task deemed reasonable.
